

WEEK 1: WELCOME TO THE APP MENTORSHIP PROGRAM!

Beth Faiman, PhD, MSN, APN-BC, AOCN®, TCTCN®, FAAN, FAPO

Since 2006, The NLB Reached Tens of Thousands of Nurses

And Directly and Indirectly Educated and Empowered Hundreds of Thousands of Patients and Their Care Partners

- Enhance the growth and influence of NLB on nursing practice
- And improve the nursing care and self-care of myeloma patients across the globe

A Community APP Mentorship Program: Bispecific Antibodies in Myeloma

- **Advanced Practice Providers (APPs), and especially those in community settings, often face limited access to specialized expertise in rapidly evolving fields like multiple myeloma (MM), yet most patients receive their care locally.**
- **The IMF NLB has launched a reciprocal, collaborative peer-mentorship model designed to integrate real-world experience in MM care with BCMA-targeted bispecific therapy.**

IMF/NLB Community APP Mentorship Program:

Bispecific Antibodies in Myeloma

Learning Objectives:

- Enhance clinical knowledge and skills of community-based APPs in initiating and managing BCMA-targeted bispecific therapies, including step-up dosing, early toxicity recognition, infection prevention, and patient education.
- Facilitate structured mentorship by pairing community APPs with experienced academic clinicians to provide ongoing guidance, case-based learning, and real-time support for complex clinical decision-making.
- Strengthen care coordination and transitions of care by implementing standardized protocols and communication pathways that ensure safe, continuous management of patients moving between academic and community oncology settings

Mentorship Program Overview

- **~30 total mentees** trained over two years
 - Welcome to the first cohort!! Thank you for being a part of this first cohort
 - We aim to incorporate your feedback and emerging clinical updates
 - This is a SELF-PACED learning – when convenient to you!
 - You can put as much effort as you wish.
- **Overarching goal:** *To provide education on myeloma and tools to manage patients on bispecific antibodies*
- **Teaching Tools:**
 - Small-group mentor-led discussions and 1:1 meetings as needed
 - Recorded presentations for later review
- **Discussion prompts** moderated by mentors via scheduled group calls

8-Week, Guided, Self-Paced Mentorship Program

Week	Content
Week 1	One-on-one touch base, kick-off calls with Mentors and Mentees. Discuss expectations
Weeks 2-4	Complete pre-questionnaire ; begin the self-guided learning modules.
Week 5	Mid-point touch base or “check-in” with a mentor-led case discussion.
Weeks 6-7	Participants continue self-learning. The course culminates with the mentee giving a presentation of learnings to mentor, either virtually or in person.
Week 8	Final touch base (3), “Putting it all together”, where mentees and their mentors have a final mentor-led case discussion, and complete post-program knowledge assessment and evaluation.

Specific Topics Integrated in the Modules

Myeloma 101 & Biomarker Overview	Foundational overview of multiple myeloma diagnosis, disease biology, staging, and introduction to biomarkers and MRD testing per International Myeloma Working Group (IMWG) criteria.
Interpreting Biomarkers & MRD in Practice	Deeper dive into molecular and cytogenetic markers, interpretation of MRD testing, and how these data guide treatment decisions and risk stratification.
Introduction to Bispecific Therapies	Review of mechanisms of action, indications, trial data, and clinical positioning of bispecific antibodies. Includes connection to biomarker-driven eligibility.
Toxicity Management & Patient Education	Management of CRS, infections, and other toxicities associated with bispecifics; strategies for patient education, monitoring, and interdisciplinary care.
Translating Knowledge to Practice	Application of content through real-world case scenarios, quality improvement examples, and strategies for integrating new knowledge into local workflows.

**Thank you for participating in this program, for
gaining knowledge and helping us to design
future learnings for others!**

Next : Please fill out your pre-evaluation form

*Any questions?
good luck!!*

PRE-PROGRAM EVALUATION FORM AND PRE-TEST
Community APP Mentorship Program: Bispecific Antibodies in Myeloma

The International Myeloma Foundation respects and appreciates your opinions. To assist us in evaluating the effectiveness of this activity and to make recommendations for future educational offerings, please take a few minutes to complete this evaluation form.

Name	Specialty ☐ Oncology ☐ Other
Organization	
Degree(s) – please select the <u>highest</u> degree that applies to you (select one) ☐ RN ☐ BSN ☐ MSN ☐ NP ☐ Doctorate ☐ PA ☐ Other	
Mailing Address:	☐ Business ☐ Home
City:	State: Zip:
Telephone:	Email:
Signature	Date:

How did you hear about this event? (You may select more than one):
☐ ONS Website ☐ U.S. Mail ☐ Email Invite ☐ On-site signage ☐ Co-worker ☐ Other _____

Please answer the following questions by circling the appropriate rating:
5 = Outstanding 4 = Good 3 = Satisfactory 2 = Fair 1 = Poor

Please indicate whether you work in a community or academic setting ☐ Community ☐ Academic ☐ Both
